

Web Science in the Universitat Oberta de Catalunya (Computer Eng., Multimedia and Telecom. Dept.)

Daniel Riera Terrén - Universitat Oberta de Catalunya. drierat@uoc.edu

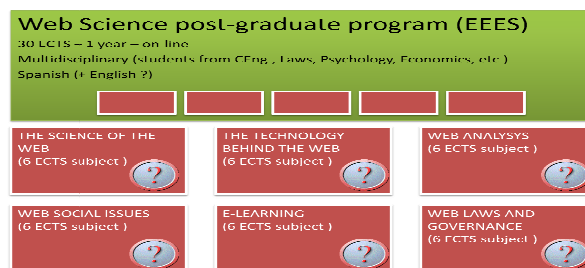

The Universitat Oberta de Catalunya is an on-line university teaching in Catalan and Spanish languages at the moment. It should be offering some postgraduate programs in English soon. The CE, MMD and T department offers three degrees: Computer Engineering, Multimedia and Telecommunication. Apart from this, we have postgraduate programs and masters on free software, bioinformatics, videogames, business intelligence, e-learning, etc.

At the moment we are working at three different curriculum levels (in a very initial stage):

- An elective subject for a Computer Engineering degree

- A Web Science post-graduate program (1 year)

- A Web Science master program (2 years)
